REACH
Complying with the REACH (Registration, Evaluation, Authorisation, and Restriction of Chemicals) regulatory framework, we published the chemical substances in our products at ASUS REACH website at http://csr.asus.com/english/REACH.htm.

Federal Communications Commission Statement
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
• This device may not cause harmful interference; and
• This device must accept any interference received including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with manufacturer’s instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

The use of shielded cables for connection of the monitor to the graphics card is required to assure compliance with FCC regulations. Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user’s authority to operate this equipment.
RF exposure warning
This equipment must be installed and operated in accordance with provided instructions and the antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provide with antenna installation instructions and transmitter operating conditions for satisfying RF exposure compliance.

Canadian Department of Communications Statement
This digital apparatus does not exceed the Class B limits for radio noise emissions from digital apparatus set out in the Radio Interference Regulations of the Canadian Department of Communications.
This class B digital apparatus complies with Canadian ICES-003.

Macrovision Corporation Product Notice
This product incorporates copyright protection technology that is protected by method claims of certain U.S. patents and other intellectual property rights owned by Macrovision Corporation and other rights owners. Use of this copyright protection technology must be authorized by Macrovision Corporation, and is intended for home and other limited viewing uses only unless otherwise authorized by Macrovision Corporation. Reverse engineering or disassembly is prohibited.

Lithium-Ion Battery Warning

CAUTION: Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer’s instructions.

Takeback Services
ASUS recycling and takeback programs come from our commitment to the highest standards for protecting our environment. We believe in providing solutions for our customers to be able to responsibly recycle our products, batteries and other components as well as the packaging materials. Please go to http://csr.asus.com/english/Takeback.htm for detail recycling information in different region.
Safety information

Disconnect the AC power and peripherals before cleaning. Wipe the Desktop PC using a clean cellulose sponge or chamois cloth dampened with solution of nonabrasive detergent and a few drops of warm water then remove any extra moisture with a dry cloth.

- **DO NOT** place on uneven or unstable work surfaces. Seek servicing if the casing has been damaged.
- **DO NOT** expose to dirty or dusty environments. **DO NOT** operate during a gas leak.
- **DO NOT** place or drop objects on top and do not shove any foreign objects into the Desktop PC.
- **DO NOT** expose to strong magnetic or electrical fields.
- **DO NOT** expose to or use near liquids, rain, or moisture. **DO NOT** use the modem during electrical storms.
- Battery safety warning: **DO NOT** throw the battery in fire. **DO NOT** short circuit the contacts. **DO NOT** disassemble the battery.
- Use this product in environments with ambient temperatures between 0°C (32°F) and 35°C (95°F).
- **DO NOT** cover the vents on the Desktop PC to prevent the system from getting overheated.
- **DO NOT** use damaged power cords, accessories, or other peripherals.
- To prevent electrical shock hazard, disconnect the power cable from the electrical outlet before relocating the system.
- Seek professional assistance before using an adapter or extension cord. These devices could interrupt the grounding circuit.
- Ensure that your power supply is set to the correct voltage in your area. If you are not sure about the voltage of the electrical outlet you are using, contact your local power company.
- If the power supply is broken, do not try to fix it by yourself. Contact a qualified service technician or your retailer.
Conventions used in this guide

To ensure that you perform certain tasks properly, take note of the following symbols used throughout this manual.

DANGER/WARNING: Information to prevent injury to yourself when trying to complete a task.

CAUTION: Information to prevent damage to the components when trying to complete a task.

IMPORTANT: Instructions that you MUST follow to complete a task.

NOTE: Tips and additional information to help you complete a task.

Where to find more information

Refer to the following sources for additional information and for product and software updates.

ASUS websites

The ASUS website provides updated information on ASUS hardware and software products. Refer to the ASUS website www.asus.com.

ASUS Local Technical Support

Visit ASUS website at http://support.asus.com/contact for the contact information of local Technical Support Engineer.

Chapter 1
Getting started

Welcome!
Thank you for purchasing the ASUS Essentio CM6731 Desktop PC!
The ASUS Essentio CM6731 Desktop PC provides cutting-edge performance,
uncompromised reliability, and user-centric utilities. All these values are encapsulated in a
stunningly futuristic and stylish system casing.

Read the ASUS Warranty Card before setting up your ASUS Desktop PC.

Getting to know your computer

Illustrations are for reference only. The ports and their locations, and the chassis color vary
with different models.

Front panel
1. **USB 2.0 ports.** These Universal Serial Bus 2.0 (USB 2.0) ports connect to USB 2.0 devices such as a mouse, printer, scanner, camera, PDA, and others.

2. **Microphone port.** This port connects to a microphone.

3. **Headphone port.** This port connects to a headphone or speaker.

4. **Optical disk drive eject button.** Press this button to eject the optical disk drive tray.

5. **MultiMediaCard (MMC) / xD-Picture (XD) / Secure Digital™ (SD) / High Capacity Secure Digital™ (SDHC) / Memory Stick Pro™ (MS/PRO) card slot.** Insert a supported memory card into this slot.

6. **Power button.** Press this button to turn on your computer.

7. **Optical disk drive bay.** There is an optical disk drive in this bay.

---

**Rear panel**
1. **Voltage selector switch.** Switch to select the appropriate system input voltage.

2. **Power connector.** Plug the power cord to this connector.

3. **Air vents.** These vents allow air ventilation.

   DO NOT block the air vents on the chassis. Always provide proper ventilation for your computer.

4. **PS/2 Keyboard / Mouse Combo port (purple/green).** This port is for a PS/2 keyboard or mouse.

5. **USB 2.0 ports.** These Universal Serial Bus 2.0 (USB 2.0) ports connect to USB 2.0 devices such as a mouse, printer, scanner, camera, PDA, and others.

6. **DVI-D port.** This port is for any DVI-D compatible device and is HDCP compliant allowing playback of HD DVD, Blu-ray, and other protected content.

7. **VGA port.** This port is for VGA-compatible devices such as a VGA monitor.

8. **USB 2.0 ports.** These Universal Serial Bus 2.0 (USB 2.0) ports connect to USB 2.0 devices such as a mouse, printer, scanner, camera, PDA, and others.

9. **LAN (RJ-45) port.** This port allows Gigabit connection to a Local Area Network (LAN) through a network hub.

   **LAN port LED indications**

10. **Line In port (light blue).** This port connects the tape, CD, DVD player, or other audio sources.

11. **Line Out port (lime).** This port connects to a headphone or a speaker. In 4-channel, 6-channel, and 8-channel configurations, the function of this port becomes Front Speaker Out.

12. **Microphone port (pink).** This port connects a microphone.

   Refer to the audio configuration table on the next page for the function of the audio ports in the 2, 4, 6, or 8-channel configuration.
13. **ASUS Graphics Card (on selected models only).** The display output ports on this optional ASUS Graphics Card may vary with different models.

14. **ASUS WLAN Card (on selected models only).** This optional WLAN card allows your computer to connect to a wireless network.

15. **Expansion slot bracket.** Remove the expansion slot bracket when installing an expansion card.

To configure an 8-channel audio output:

Use a chassis with HD audio module in the front panel to support an 8-channel audio output.
Setting up your computer

This section guides you through connecting the main hardware devices, such as the external monitor, keyboard, mouse, and power cord, to your computer.

Connecting an external monitor

Using the ASUS Graphics Card (on selected models only)

Connect your monitor to the display output port on the discrete ASUS Graphics Card.

To connect an external monitor using the ASUS Graphics Card:

1. Connect a monitor to a display output port on the ASUS Graphics Card.
2. Plug the monitor to a power source.

The display output ports on the ASUS Graphics Card may vary with different models.
Using the onboard display output ports
Connect your monitor to the onboard display output port.

To connect an external monitor using the onboard display output ports:

1. Connect a VGA monitor to the VGA port, or a DVI-D monitor to the DVI-D port, or an HDMI monitor to the HDMI port on the rear panel of your computer.
2. Plug the monitor to a power source.

- If your computer comes with an ASUS Graphics Card, the graphics card is set as the primary display device in the BIOS. Hence, connect your monitor to a display output port on the graphics card.
- To connect multiple external monitors to your computer, refer to Connecting multiple external monitors in Chapter 3 of this user manual for details.
Connecting a USB keyboard and a USB mouse
Connect a USB keyboard and a USB mouse to the USB ports on the rear panel of your computer.

Connecting the power cord
Connect one end of the power cord to the power connector on the rear panel of your computer and the other end to a power source.
Turning your computer ON/OFF

This section describes how to turn on/off your computer after setting up your computer.

Turning your computer ON
To turn your computer ON:

1. Turn on the power switch.
2. Turn your monitor ON.
3. Press the power button on your computer.

4. Wait until the operating system loads automatically.

Turning your computer OFF
To turn your computer OFF:

1. Close all running applications.
2. Click on the Windows® desktop.
3. Click to shut down the operating system.
Starting for the first time

When you start your computer for the first time, a series of screens appear to guide you in configuring the basic settings of your Windows® 7 operating system.

To start for the first time:

1. Turn your computer on. Wait for a few minutes until the Set Up Windows screen appears.
2. From dropdown list, select your language, then click Next.
3. From the dropdown lists, select your Country or region, Time and currency, and Keyboard layout, then click Next.
4. Key in uniques names for the user name and computer name, then click Next.
5. Key in the necessary information to set up your password, then click Next. You may also click Next to skip this step without entering any information.

If you want to set up a password for your account later, refer to the section Setting up a user account and password in this chapter.

6. Carefully read the license terms. Tick I accept the license terms and click Next.
7. Select Use recommended settings or Install important updates only to set up the security settings for your computer. To skip this step, select Ask me later.
8. Review your date and time settings. Click Next. The system loads the new settings and restarts. You may now start using your computer.
Using Windows® 7 desktop

Click the Start icon > Help and Support to obtain more information about Windows® 7.

Using the Start menu

The Start menu gives you access to programs, utilities, and other useful items on your computer. It also provides you with more information about Windows 7 through its Help and Support feature.

Launching items from the Start menu

To launch items from the Start menu:

1. From the Windows® taskbar, click the Start icon.
2. From the Start menu, select the item that you want to launch.

You may pin programs that you want constantly displayed on the Start menu. For more details, refer to the section Pinning programs on the Start menu or taskbar on this chapter.

Using the Getting Started item

The Getting Started item on the Start menu contains information about some basic tasks such as personalizing Windows®, adding new users, and transferring files to help you to familiarize yourself with using Windows® 7.

To use the Getting Started item:

1. From the Windows® taskbar, click the Start icon to launch the Start menu.
2. Select Getting Started. The list of available tasks appears.
3. Select the task that you want to do.

Using the taskbar

The taskbar allows you to launch and manage programs or items installed on your computer.

Launching a program from the taskbar

To launch a program from the taskbar:

• From the Windows® taskbar, click an icon to launch it. Click the icon again to hide the program.

You may pin programs that you want constantly displayed on the taskbar. For more details, refer to the section Pinning programs on the Start menu or taskbar on this chapter.
Pinning items on the jumplists
When you right-click an icon on the taskbar, a jumplist launches to provide you with quick-access to the program’s or item’s related links. You may pin items on the jumplist such as favorite websites, often-visited folders or drives, or recently played media files.

To pin items to the jumplist:
1. From the taskbar, right-click an icon.
2. From the jumplist, right-click the item that you want to pin, then select **Pin to this list**.

Unpinning items from the jumplist
To unpin items from the jumplist:
1. From the taskbar, right-click an icon.
2. From the jumplist, right-click the item that you want to remove from the jumplist, then select **Unpin from this list**.

Pinning programs on the Start menu or taskbar
To pin programs on the Start menu or taskbar:
1. From the Windows® taskbar, click the Start icon to launch the Start menu.
2. Right-click the item that you want to pin on the Start menu or taskbar.
3. Select **Pin to Taskbar** or **Pin to Start menu**.

You may also right-click on the icon of a running program on the taskbar, then select **Pin this program to taskbar**.

Unpinning programs from the Start menu
To unpin programs from the Start menu:
1. From the Windows® taskbar, click the Start icon to launch the Start menu.
2. From the Start menu, right-click the program that you want to unpin, then select **Remove from this list**.

Unpinning programs from the taskbar
To unpin programs from the taskbar:
1. From the taskbar, right-click the program that you want to remove from the taskbar, then select **Unpin this program from taskbar**.
Using the notification area
By default, the notification area shows these three icons:

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Action Center</td>
<td>Click this icon to display all the alert messages/notifications and launch the Windows® Action Center.</td>
</tr>
<tr>
<td>Network connection</td>
<td>This icon displays the connection status and signal strength of the wired or wireless network connection.</td>
</tr>
<tr>
<td>Volume</td>
<td>Click this icon to adjust the volume.</td>
</tr>
</tbody>
</table>

Displaying an alert notification
To display an alert notification:

• Click the Notification icon, then click the message to open it.

For more details, refer to the section Using Windows® Action Center in this chapter.

Customizing icons and notifications
You may choose to display or hide the icons and notifications on the taskbar or on the notification area.

To customize icons and notifications:

1. From the notification area, click on the arrow icon.
2. Click Customize.
3. From the dropdown list, select the behaviors for the icons or items that you want to customize.

Managing your files and folders

Using Windows® Explorer
Windows® Explorer allows you to view, manage, and organize your files and folders.

Launching Windows® Explorer
To launch Windows Explorer:

1. From the Windows® taskbar, click the Start icon to launch the Start menu.
2. Click Computer to launch Windows Explorer.
Exploring files and folders
To explore files and folders:
1. Launch Windows® Explorer.
2. From the navigation or view pane, browse for the location of your data.
3. From the breadcrumb bar, click the arrow to display the contents of the drive or folder.

Customizing the file/folder view
To customize the file/folder view:
1. Launch Windows Explorer.
2. From the navigation pane, select the location of your data.
3. From the toolbar, click the View icon.
4. From the View menu, move the slider to select how you want to view the file/folder.
   
   You may also right-click anywhere on the View pane, click View, and select the view type that you want.

Arranging your files
To arrange your files:
1. Launch Windows Explorer.
2. From the Arrange by field, click to display the dropdown list.
3. Select your preferred arrangement type.

Sorting your files
To sort your files:
1. Launch Windows Explorer.
2. Right-click anywhere on the View pane.
3. From the menu that appears, select Sort by, then select your preferred sorting type.

Grouping your files
To group your files:
1. Launch Windows Explorer.
2. Right-click anywhere on the View pane.
3. From the menu that appears, select Group by, then select your preferred grouping type.
Adding a new folder
To add a new folder:

1. Launch Windows Explorer.
2. From the toolbar, click **New folder**.
3. Key in a name for the new folder.

You may also right-click anywhere on the View pane, click **New > Folder**.

Back up your files

**Setting up a backup**

To set up a backup:

1. Click **> All Programs > Maintenance > Backup and Restore**.
2. Click **Set up backup**. Click **Next**.
3. Select your backup destination. Click **Next**.
4. Select **Let Windows choose (recommended)** or **Let me choose as your backup mode**.

If you select **Let Windows choose**, Windows will not back up your programs, FAT-formatted files, Recycle Bin files, or temporary files that are 1GB or more.

5. Follow the onscreen instructions to finish the process.

Restoring your system settings

The Windows® System Restore feature creates a restore point where the computer’s system settings are stored at certain time and date. It allows you to restore or undo changes to your computer’s system settings without affecting your personal data.

**To restore your system:**

1. Close all running applications.
2. Click **> All Programs > Accessories > System Tools > System Restore**.
3. Follow the onscreen instructions to complete the process.
Protecting your computer

Using Windows® 7 Action Center
Windows® 7 Action Center provides you with alert notifications, security information, system maintenance information, and the option to automatically troubleshoot and fix some common computer problems.

You may customize the notifications. For more details, refer to the previous section Customizing icons and notifications in this chapter.

Launching Windows® 7 Action Center
To launch Windows® 7 Action Center:
1. To launch Windows 7 Action Center, click the Notification icon , then click Open Action Center.
2. From Windows 7 Action Center, click the task that you want to do.

Using Windows® Update
Windows Update allows you to check and install the latest updates to enhance the security and performance of your computer.

Launching Windows® Update
To launch Windows® Update:
1. From the Windows® taskbar, click the Start icon to launch the Start menu.
2. Select All Programs > Windows Update.
3. From the Windows Update screen, click the task that you want to do.

Setting up a user account and password
You may create user accounts and passwords for people who will use your computer.

Setting up a user account
To set up a user account:
1. From the Windows® taskbar, click > Getting Started > Add new users.
2. Select Manage another account.
3. Select Create a new account.
4. Key in the name of the new user.
5. Select either Standard user or Administrator as the user type.
6. When done, click Create Account.
Setting up a user’s password
To set up a user’s password:

1. Select the user that you would like to set a password.
2. Select Create a password.
3. Key in a password and confirm it. Key in your password’s hint.
4. When done, click Create password.

Activating the anti-virus software
Trend Micro Internet Security is pre-installed on your computer. It is a third-party anti-virus software protecting your computer from virus. It is purchased separately. You have a 30-day trial period after activating it.

To activate Trend Micro Internet Security:

1. Run the Trend Micro Internet Security application.
2. Carefully read the license terms. Click Agree & Activate.
3. Input your e-mail address and select your location. Click Next.
4. Click Finish to complete the activation.

Getting Windows® Help and Support
Windows® Help and Support provides you with guides and answers in using the applications in Windows® 7 platform.

To launch Windows® Help and Support, click 🛡️ > Help and Support.

Ensure that you are connected to the Internet to obtain the latest Windows® online help.
Chapter 3
Connecting devices to your computer

Connecting a USB storage device
This desktop PC provides USB 2.0/1.1 ports on both the front and rear panels and USB3.0 ports on the rear panel. The USB ports allow you to connect USB devices such as storage devices.

To connect a USB storage device:
• Insert the USB storage device to your computer.

To remove a USB storage device:
1. Click from the Windows notification area on your computer, then click Eject USB2.0 FlashDisk.

2. When the Safe to Remove Hardware message pops up, remove the USB storage device from your computer.

DO NOT remove a USB storage device when data transfer is in progress. Doing so may cause data loss or damage the USB storage device.
Connecting microphone and speakers

This desktop PC comes with microphone ports and speaker ports on both the front and rear panels. The audio I/O ports located on the rear panel allow you to connect 2-channel, 4-channel, 6-channel, and 8-channel stereo speakers.

Connecting Headphone and Mic

Connecting 2-channel Speakers
Connecting 4-channel Speakers

Connecting 6-channel Speakers
Connecting 8-channel Speakers
Connecting multiple external displays

Your desktop PC may come with VGA, HDMI, or DVI ports and allows you to connect multiple external displays.

When a graphics card is installed in your computer, connect the monitors on the output ports of the graphics card.

Setting up multiple displays

When using multiple monitors, you are allowed to set display modes. You can use the additional monitor as a duplicate of your main display, or as an extension to enlarge your Windows desktop.

To set up multiple displays:

1. Turn off your computer.
2. Connect the two monitors to your computer and connect the power cords to the monitors. Refer to Setting up your computer section in Chapter 1 for details on how to connect a monitor to your computer.

For some graphic cards, only the monitor that is set to be the primary display has display during POST. The dual display function works only under Windows.
3. Turn on your computer.

4. Do any of the following to open the Screen Resolution setting screen:
   - Click 📲 > Control Panel > Appearance and Personalization > Display > Change display settings.
   - Right click anywhere on your Windows desktop. When the pop-up menu appears, click Personalize > Display > Change display settings.

5. Select the display mode from the Multiple displays: drop-down list.
   - **Duplicate these displays**: Select this option to use the additional monitor as a duplicate of your main display.
   - **Extend these displays**: Select this option to use the additional monitor as an extension display. This increases your desktop space.
   - **Show desktop only on 1 / 2**: Select this option to show desktop only on monitor 1 or monitor 2.
   - **Remove this display**: Select this options to remove the selected display.

6. Click **Apply** or **OK**. Then click **Keep Changes** on the confirmation message.
Chapter 4
Using your computer

Proper posture when using your Desktop PC

When using your Desktop PC, maintaining the proper posture is necessary to prevent strain to your wrists, hands, and other joints or muscles. This section provides you with tips on avoiding physical discomfort and possible injury while using and fully enjoying your Desktop PC.

To maintain the proper posture:

• Position your computer chair to make sure that your elbows are at or slightly above the keyboard to get a comfortable typing position.

• Adjust the height of your chair to make sure that your knees are slightly higher than your hips to relax the backs of your thighs. If necessary, use a footrest to raise the level of your knees.

• Adjust the back of your chair so that the base of your spine is firmly supported and angled slightly backward.

• Sit upright with your knees, elbows and hips at an approximately 90° angle when you are at the PC.

• Place the monitor directly in front of you, and turn the top of the monitor screen even with your eye level so that your eyes look slightly downward.

• Keep the mouse close to the keyboard, and if necessary, use a wrist rest for support to reduce the pressure on your wrists while typing.

• Use your Desktop PC in a comfortably-lit area, and keep it away from sources of glare such as windows and straight sunlight.

• Take regular mini-breaks from using your Desktop PC.
Using the memory card reader

Digital cameras and other digital imaging devices use memory cards to store digital picture or media files. The built-in memory card reader on the front panel of your system allows you to read from and write to different memory card drives.

To use the memory card:

1. Insert the memory card into the card slot.
   - A memory card is keyed so that it fits in only one direction. DO NOT force a card into a slot to avoid damaging the card.
   - You can place media in one or more of the card slots and use each media independently. Place only one memory card in a slot at one time.

2. Select a program from the AutoPlay window to access your files.
   - If AutoPlay is NOT enabled in your computer, click Windows® 7 Start button on the taskbar, click Computer, and then double-click the memory card icon to access the data on it.
   - Each card slot has its own drive icon which is displayed on the Computer screen.
   - The memory card reader LED lights up and blinks when data is being read from or written to the memory card.

3. When finished, right-click the memory card drive icon on the Computer screen, click Eject, and then remove the card.

   Never remove cards while or immediately after reading, copying, formatting, or deleting data on the card or else data loss may occur.

   To prevent data loss, use “Safely Remove Hardware and Eject Media” in the Windows notification area before removing the memory card.
Using the optical drive

Inserting an optical disc
To insert an optical disc:

1. While your system is on, press the eject button below the drive bay cover to open the tray.
2. Place the disc to the optical drive with the label side facing up.
3. Push the tray to close it.
4. Select a program from the AutoPlay window to access your files.

If AutoPlay is NOT enabled in your computer, click Windows® 7 Start button on the taskbar, click Computer, and then double-click the CD/DVD drive icon to access the data on it.

Removing an optical disc
To remove an optical disc:

1. While the system is on, do either of the following to eject the tray:
   • Press the eject button below the drive bay cover.
   • Right-click the CD/DVD drive icon on the Computer screen, and then click Eject.
2. Remove the disc from the disc tray.
Using the multimedia keyboard
(on selected models only)

The keyboard varies with models. The illustrations on this section are for reference only.

Chapter 5
Connecting to the Internet

Wired connection

Use an RJ-45 cable to connect your computer to a DSL/cable modem or a local area network (LAN).

Connecting via a DSL/cable modem

To connect via a DSL/cable modem:

1. Set up your DSL/cable modem.

   Refer to the documentation that came with your DSL/cable modem.

2. Connect one end of an RJ-45 cable to the LAN (RJ-45) port on the rear panel of your computer and the other end to a DSL/cable modem.

3. Turn on the DSL/cable modem and your computer.

4. Configure the necessary Internet connection settings.

   Contact your Internet Service Provider (ISP) for details or assistance in setting up your Internet connection.
Connecting via a local area network (LAN)

To connect via a LAN:

1. Connect one end of an RJ-45 cable to the LAN (RJ-45) port on the rear panel of your computer and the other end to your LAN.

2. Turn on your computer.

3. Configure the necessary Internet connection settings.

Contact your network administrator for details or assistance in setting up your Internet connection.
Wireless connection (on selected models only)

Connect your computer to the Internet through a wireless connection.

To establish a wireless connection, you need to connect to a wireless access point (AP).

- To increase the range and sensitivity of the wireless radio signal, connect the external antenna to the antenna connectors on the ASUS WLAN Card.
- The external antenna is an optional item.

To connect to a wireless network:

1. Click the network icon in the notification area to display the available wireless networks.
2. Select the wireless network that you want to connect to, then click Connect.
3. You may need to key in the network security key for a secured wireless network, then click OK.
4. Wait while your computer is connecting to the wireless network.
5. The wireless connection is established successfully. The connection status is displayed and the network icon displays the connected status.
Chapter 6

Using the utilities

ASUS AI Suite II

ASUS AI Suite II is an all-in-one interface that integrates several ASUS utilities and allows users to launch and operate these utilities simultaneously.

Installing AI Suite II

To install AI Suite II:

1. Place the support DVD in the optical drive. The Drivers installation tab appears if Autorun is enabled.
2. Click the Utilities tab, then click ASUS AI Suite II.
3. Follow the onscreen instructions to complete the installation.

Using AI Suite II

AI Suite II automatically starts when you enter the Windows® operating system. The AI Suite II icon appears in the Windows® notification area. Click the icon to open the AI Suite II main menu bar.

Click each button to select and launch a utility, to monitor the system, to update the motherboard BIOS, to display the system information, and to customize the settings of AI Suite II.

The Support DVD and Recovery DVD may not be included in the package. You may use the Recovery Partition feature to create the Support DVD and Recovery DVD. For details, refer to Recovering your system in this chapter.
The Tool menu

The Tool menu includes the EPU, Probe II, and Sensor Recorder panels.

Launching EPU

EPU is an energy-efficient tool that provides you with a total power-saving solution. It detects the current loading and intelligently adjusts the power usage in real-time. When you select the Auto mode, the system changes modes automatically according to the current system status. It allows you to customize each mode through configuring the settings such as CPU frequency, vCore Voltage, and Fan Control.

To launch EPU:

• Click Tool > EPU on the AI Suite II main menu bar.

  • *Select From EPU Installation to show the CO2 that has been reduced since you installed EPU.
  • *Select From the Last Reset to show the total CO2 that has been reduced since you click the Clear button.

Displays the following message if no VGA power saving engine is detected.

Displays current mode

The items lighting up means power saving engine is activated

Displays the amount of CO2 reduced

*Shifts between the display of Total and Current CO2 reduced

Displays the current CPU power

Multiple system operating modes

Advanced settings for each mode

Displays the system properties of each mode
Launching and configuring Probe II

Probe II is a utility that monitors the computer’s vital components, and detects and alerts you of any problem with these components. Probe II senses fan rotations, CPU temperature, and system voltages, among others. With this utility, you are assured that your computer is always at a healthy operating condition.

To launch Probe II:

- Click Tool > Probe II on the AI Suite II main menu bar.

To configure Probe II:

- Click the Voltage/Temperature/Fan Speed tabs to activate the sensors or to adjust the sensor threshold values.
- The Preference tab allows you to customize the time interval of sensor alerts, or change the temperature unit.
Launching and configuring Sensor Recorder

Sensor Recorder allows you to monitor the changes in the system voltage, temperature, and fan speed, as well as recording the changes.

To launch Sensor Recorder:

- Click **Tool > Sensor Recorder** on the AI Suite II main menu bar.

To configure Sensor Recorder:

- Click the **Voltage/Temperature/Fan Speed** tabs and select the sensors that you want to monitor.
- The **History Record** tab allows you to record the changes in the sensors that you enable.
The Monitor menu
The Monitor menu includes the Sensor and CPU Frequency panels.

Launching Sensor
The Sensor panel displays the current value of a system sensor such as fan rotation, CPU temperature, and voltages.

To launch Sensor:
- Click Monitor > Sensor on the AI Suite II main menu bar.

Launching CPU Frequency
The CPU Frequency panel displays the current CPU frequency and CPU usage.

To launch CPU frequency:
- Click Monitor > CPU Frequency on the AI Suite II main menu bar.

The Update menu
The Update menu allows you to update the motherboard BIOS and the BIOS boot logo with the ASUS designed update utilities.

ASUS Update
The ASUS Update is a utility that allows you to manage, save, and update the motherboard BIOS in Windows® OS. The ASUS Update utility allows you to update the BIOS directly from the Internet, download the latest BIOS file from the Internet, update the BIOS from an updated BIOS file, save the current BIOS file or view the BIOS version information.

Updating the BIOS through the Internet
To update the BIOS through the Internet:
1. From the ASUS Update screen, select Update BIOS from file, then click Next.
2. Select the ASUS FTP site nearest you to avoid network traffic.
   Tick the two items if you want to enable the BIOS downgradable and Auto-BIOS backup functions.
3. Select the BIOS version that you want to download, then click Next.
   When no updated version is detected, a message is displayed informing you that there is no new BIOS file from the BIOS server.
4. Click Yes if you want to change the boot logo, which is the image appearing on screen during the Power-On Self-Tests (POST). Otherwise, click No.
5. Follow the onscreen instructions to complete the update process.
Updating the BIOS through a BIOS file
To update the BIOS through a BIOS file:

1. From the ASUS Update screen, select **Update BIOS from file**, then click **Next**.
2. Locate the BIOS file from the Open window, click **Open**, and click **Next**.
3. Click **Yes** if you want to change the boot logo, which is the image appearing on screen during the Power-On Self-Tests (POST). Otherwise, click **No**.
4. Follow the onscreen instructions to complete the update process.

The System Information screen
The System Information screen displays the information about the motherboard, CPU, and memory slots.

- Click the **MB** tab to see the details on the motherboard manufacturer, product name, version, and BIOS.
- Click the **CPU** tab to see the details on the processor and the Cache.
- Click the **SPD** tab and then select the memory slot to see the details on the memory module installed on the corresponding slot.

The Settings screen
The Settings screen allows you to customize the main menu bar settings and the interface’s skin.

- Application allows you to select the application that you want to enable.
- Bar allows you to modify the bar setting.
- Skin allows you to customize the interface’s contrast, brightness, saturation, hue, and gamma.
ASUS AI Manager

ASUS AI Manager is a utility which gives you quick and easy access to frequently-used applications.

Installing AI Manager

To install AI Manager:

1. Place the support DVD in the optical drive. If Autorun is enabled, the Drivers installation wizard appears.

   If Autorun is disabled, double-click the setup.exe file from the ASUS AI Manager folder in the support DVD.

2. Click the Utilities tab, then click ASUS AI Manager.
3. Follow the onscreen instructions to complete the installation.

Launching AI Manager

To launch the AI Manager from the Windows® desktop, click Start > All Programs > ASUS > AI Manager > AI Manager 1.xx.xx. The AI Manager quick bar appears on the desktop.

After launching the application, the AI Manager icon appears in the Windows® taskbar. Right-click this icon to switch between the quick bar and the main window, and to launch the AI Manager either from the quick bar or taskbar.

AI Manager quick bar

The AI Manager quick bar saves the desktop space and allows you to launch the ASUS utilities or display system information easily. Click any of the Main, My Favorites, Support or Information tab to display the menu’s contents.

Click the Maximize/restore button to switch between full window and quick bar. Click the Minimize button to keep the AI Manager on the taskbar. Click the Close button to quit the AI Manager.

Main

The Main menu contains three utilities: AI Disk, AI Security, and AI Booting. Click the arrow on the Main menu icon to browse through the utilities in the main menu.
**AI Disk**
AI Disk allows you to easily clear temporary IE files, IE cookies, IE URLs, IE history, or the Recycle Bin. Click the AI Disk icon on the quick bar to display the full AI Disk window and select the items you want to clear. Click **Apply** when done.

**AI Security**
AI Security enables you to set a password to secure your devices, such as USB flash disks and CD/DVD disks, from unauthorized access.

**To lock a device:**
1. When using AI Security for the first time, you are asked to set a password. Key in a password with at most 20 alphanumeric characters.
2. Confirm the password.
3. Key in the password hint (recommended).
4. When done, click **Ok**.
5. Select the device you want to lock, then click **Apply**.
6. Key in the password you have set previously, then click **Ok**.

**To unlock the device:**
1. Deselect the locked device, then click **Apply**.
2. Key in the password you have set previously, then click **Ok**.

**To change the password:**
- Click **Change Password**, then follow the onscreen instructions to change password.

**AI Booting**
AI Booting allows you to specify the boot device priority sequence.

**To specify the boot sequence:**
1. Select a device, then click the left/right button to specify the boot sequence.
2. When done, press **Apply**.

**My Favorites**
My Favorites allows you to add applications that you frequently use, saving you from searching for the applications throughout your computer.
To add an application:

1. Click **Add**, then locate the application you want to add to **My Favorites**.
2. Click **Open** on the file location window. The application is added to **My Favorites** list.

Right click on the application icon to launch, delete, or rename the selected application. You can also double click to launch the selected application.

**Support**

Click any links on the **Support** window to go to the ASUS website, technical support website, download support website, or contact information.

**Information**

Click the tab on the **Information** window to see the detailed information about your system, motherboard, CPU, BIOS, installed device(s), and memory.
ASUS Webstorage

ASUS webstorage is designed to help you retrieve your data to your notebooks, smartphones or tablets wherever there is internet connection.

Installing webstorage

To install webstorage:

Place the support DVD in the optical drive. Double-click the setup.exe file from the ASUS WebStorage folder in the Software folder in the support DVD.

Launching Webstorage

To launch the WebStorage from the Windows® desktop, click Start > All Programs > ASUS > Webstorage. The webstorage quick bar appears in the Windows® taskbar. Right-click this icon to switch between the quick bar and the main window.

Drive

Allows your to retrieve all your backups, synced files, share groups and password protected data from here. Right-click the mouse to preview files before downloading or generating a sharing URL.

Backup

To backup your most important data with simple steps: preset a backup schedule with your preferences in cloud storage; or select “Auto Backup” for complete data backup.

MySyncFolder

To store the updated files to MySyncFolder for easy access and share of all types of files without the limitation of location or device.
Calendar
ASUS WebStorage automatically syncs the most updated calendar events to all personal computers so that you know the exact events no matter which PC is in use.

BookmarkSyncer
The convenient BookmarkSyncer keeps your browser preference and bookmark to the cloud automatically synchronized in multiple computers.

MobileApp
ASUS WebStorage mobile applications sync your files between multiple devices. It also supports transcoding technology that allows preview and files streaming on your mobile phone.

Go to Web
Experience the value-added cloud service through ASUS WebStorage, without the risk of losing data.

Settings
1. Click the Settings icon, the settings interface appears.
2. Follow the onscreen instructions to complete the configuration.
ASUS Easy Update

ASUS Easy Update is a software tool that automatically detects the latest drivers and applications for your system.

1. From the Windows® notification area, right-click the ASUS Easy Update icon.

2. Select Schedule to set how often you want to update your system.

3. Select Update to activate the update.

4. Click OK to display the items you can download.

5. Check the item(s) you want to download, and then click OK.
Nero 9
Nero 9 allows you to create, copy, burn, edit, share, and update different kinds of data.

Installing Nero 9
To install Nero 9:
1. Insert the Nero 9 DVD into your optical drive.
2. If Autorun is enabled, the main menu appears automatically.

If Autorun is disabled, double-click the Seup\exe file from the main directory of your Nero 9 DVD.

3. From the main menu, click Nero 9 Essentials.
4. Select the language you want to use for Installation Wizard. Click Next.
5. Click Next to continue.
6. Tick I accept the License Conditions. When done, click Next.
7. Select Typical then click Next.
8. Tick Yes, I want to help by sending anonymous application data to Nero then click Next.
9. When done, click Exit.

Burning files
To burn files:
1. From the main menu, click Data Burning > Add.
2. Select the files that you want to burn. When done, click Add.
3. After selecting files that you want to burn, click Burn to burn the files to a disc.

For more details about using Nero 9, refer to the Nero website at www.nero.com
Recovering your system

Using the Recovery Partition
The Recovery Partition quickly restores your Desktop PC’s software to its original working state. Before using the Recovery Partition, copy your data files (such as Outlook PST files) to USB storage devices or to a network drive and make note of any customized configuration settings (such as network settings).

About the Recovery Partition
The Recovery Partition is a reserved space on your hard disk drive used to restore the operating system, drivers, and utilities installed on your Desktop PC at the factory.

DO NOT delete the partition named RECOVERY. The Recovery Partition is created at the factory and cannot be restored if deleted. Take your Desktop PC to an authorized ASUS service center if you have problems with the recovery process.

Using the Recovery Partition:

1. Press <F9> during bootup.
2. Press <Enter> to select Windows Setup [EMS Enabled].
3. Select one of the following recovery options.
   
   **System Recovery:**
   This feature allows you to restore the system to the factory default settings.

   **System Image Backup:**
   This feature allows you to burn the system image backup in DVD discs, which you can use later to restore the system to its default settings.

   **System DVD Backup:**
   This feature allows you to make a backup copy of the support DVD.

4. Follow the onscreen instructions to complete the recovery process.

Visit the ASUS website at www.asus.com for updated drivers and utilities.
Using the Recovery DVD (on selected models)

Prepare 1~3 blank writable DVDs as instructed to create the Recovery DVD.

Remove the external hard disk drive before performing system recovery on your Desktop PC. According to Microsoft, you may lose important data because of setting up Windows on the wrong disk drive or formatting the incorrect drive partition.

To use the Recovery DVD:

1. Insert the Recovery DVD into the optical drive. Your Desktop PC needs to be powered ON.
2. Restart the Desktop PC and press `<F8>` on bootup and select the optical drive (may be labeled as “CD/DVD”) and press `<Enter>` to boot from the Recovery DVD.
3. Select OK to start to restore the image.
4. Select OK to confirm the system recovery.
5. Follow the onscreen instructions to complete the recovery process.

DO NOT remove the Recovery disc, unless instructed to do so, during the recovery process or else your partitions will be unusable.

Visit the ASUS website at www.asus.com for updated drivers and utilities.
Chapter 7
Troubleshooting

Troubleshooting
This chapter presents some problems you might encounter and the possible solutions.

? My computer cannot be powered on and the power LED on the front panel does not light up
  • Check if your computer is properly connected.
  • Check if the wall outlet is functioning.
  • Check if the Power Supply Unit is switched on. Refer to the section Turning your computer ON/OFF in Chapter 1.

? My computer hangs.
  • Do the following to close the programs that are not responding:
    1. Simultaneously press <Alt> + <Ctrl> + <Delete> keys on the keyboard, then click Start Task Manager.
    2. Click Applications tab.
    3. Select the program that is not responding, then click End Task.
  • If the keyboard is not responding. Press and hold the Power button on the top of your chassis until the computer shuts down. Then press the Power button to turn it on.

? I cannot connect to a wireless network using the ASUS WLAN Card (on selected models only)?
  • Ensure that you enter the correct network security key for the wireless network you want to connect to.
  • Properly connect the external antenna (optional) to the antenna connectors on the ASUS WLAN Card.

? The arrow keys on the number key pad are not working.
  Check if the Number Lock LED is off. When the Number Lock LED is on, the keys on the number key pad are used to input numbers only. Press the Number Lock key to turn the LED off if you want to use the arrow keys on the number key pad.
No display on the monitor.

- Check if the monitor is powered on.
- Ensure that your monitor is properly connected to the video output port on your computer.
- If your computer comes with a discrete graphics card, ensure that you connect your monitor to a video output port on the discrete graphics card.
- Check if any of the pins on the monitor video connector is bent. If you discover bent pins, replace the monitor video connector cable.
- Check if your monitor is plugged to a power source properly.
- Refer to the documentation that came with your monitor for more troubleshooting information.

When using multiple monitors, only one monitor has display.

- Ensure that both monitors are powered on.
- During POST, only the monitor connected to the VGA port has display. The dual display function works only under Windows.
- When a graphics card is installed on your computer, ensure that you connect the monitors to the output port on the graphics card.
- Check if the multiple displays settings are correct. Refer to section Connecting multiple external displays in Chapter 3 for details.

My computer cannot detect my USB storage device.

- The first time you connect your USB storage device to your computer, Windows automatically installs a driver for it. Wait for a while and go to My Computer to check if the USB storage device is detected.
- Connect your USB storage device to another computer to test if the USB storage device is broken or malfunctions.

I want to restore or undo changes to my computer’s system settings without affecting my personal files or data.

The Windows® System Restore feature allows you to restore or undo changes to your computer’s system settings without affecting your personal data such as documents or photos. For more details, refer to the section Restoring your system in Chapter 2.
? **My speakers produce no sound.**

- Ensure that you connect your speakers to the Line out port (lime) on the front panel or the rear panel.
- Check if your speaker is connected to a electrical source and turned on.
- Adjust your speakers’ volume.
- Ensure that your computer’s system sounds are not Muted.
  - If it is muted, the volume icon is displayed as 🎧. To enable the system sounds, click 🎧 from the Windows notification area, then click 🎧.
  - If it is not muted, click 🎧 and drag the slider to adjust the volume.
- Connect your speakers to another computer to test if the speakers are working properly.

? **The DVD drive cannot read a disc.**

- Check if the disc is placed with the label side facing up.
- Check if the disc is centered in the tray, especially for the discs with non-standard size or shape.
- Check if the disc is scratched or damaged.

? **The DVD drive eject button is not respond.**

1. Click 📦 > Computer.
2. Right-click ⏹️, then click Eject from the menu.
## Power

|                                        | Incompatible softwares are installed.   | Reinstall the OS and reinstall compatible softwares.                   |
## CPU

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Cause</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Too noisy right after turning on the computer.</td>
<td>Your computer is booting up.</td>
<td>It is normal. The fan runs on its full speed when the computer is powering on. The fan slows down after entering the OS.</td>
</tr>
<tr>
<td></td>
<td>The BIOS settings have been changed.</td>
<td>Restore the BIOS to its default settings.</td>
</tr>
<tr>
<td></td>
<td>Old BIOS version</td>
<td>Update the BIOS to the latest version. Visit the ASUS Support site at <a href="http://support.asus.com">http://support.asus.com</a> to download the latest BIOS versions.</td>
</tr>
<tr>
<td>Computer is too noisy when in use.</td>
<td>The CPU fan has been replaced.</td>
<td>Ensure that you are using a compatible or ASUS-recommended CPU fan.</td>
</tr>
<tr>
<td></td>
<td>There is not enough air ventilation for the computer.</td>
<td>Ensure that your computer is working in an area with good air flow.</td>
</tr>
<tr>
<td></td>
<td>The system temperature is too high.</td>
<td>• Update the BIOS. • If you know how to reinstall the motherboard, try to clean the inner space of the chassis.</td>
</tr>
