ASUS Recycling/Takeback Services
ASUS recycling and takeback programs come from our commitment to the highest standards for protecting our environment. We believe in providing solutions for you to be able to responsibly recycle our products, batteries, other components, as well as the packaging materials. Please go to http://csr.asus.com/english/Takeback.htm for the detailed recycling information in different regions.

REACH
Complying with the REACH (Registration, Evaluation, Authorisation, and Restriction of Chemicals) regulatory framework, we published the chemical substances in our products at ASUS REACH website at http://csr.asus.com/english/REACH.htm

Federal Communications Commission Statement
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
• This device may not cause harmful interference; and
• This device must accept any interference received including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with manufacturer’s instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

The use of shielded cables for connection of the monitor to the graphics card is required to assure compliance with FCC regulations. Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user’s authority to operate this equipment.

Lithium Battery Warning
CAUTION: Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer’s instructions.
IC: Canadian Compliance Statement
Complies with the Canadian ICES-003 Class B specifications. This device complies with RSS 210 of Industry Canada. This Class B device meets all the requirements of the Canadian interference-causing equipment regulations.
This device complies with Industry Canada license exempt RSS standard(s). Operation is subject to the following two conditions: this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.
Cut appareil numérique de la Classe B est conforme à la norme NMB-003 du Canada. Cet appareil numérique de la Classe B respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.
Cet appareil est conforme aux normes CNR exemptes de licence d’Industrie Canada. Le fonctionnement est soumis aux deux conditions suivantes.
(1) cet appareil ne doit par provoquer d’interférences et
(2) cet appareil doit accepter toute interférence, y compris celles susceptibles de provoquer un fonctionnement non souhaité de l’appareil.

Canadian Department of Communications Statement
This digital apparatus does not exceed the Class B limits for radio noise emissions from digital apparatus set out in the Radio Interference Regulations of the Canadian Department of Communications.
This class B digital apparatus complies with Canadian ICES-003.

KC: Korea Warning Statement
이 기기는 가정용(B급) 전자파전파기기로서 주로 가정에서 사용하는 것을 목적으로 하며, 모든 지역에서 사용할 수 있습니다.
*당해 무선설비는 전파혼신 가능성이 있으므로 인명안전과 관련된 서비스는 할 수 없습니다.
VCCI: Japan Compliance Statement

VCCI Class B Statement

This is a Class B product based on the standard of the VCCI Council. If this is used near a radio or television receiver, it may cause radio interference. Install and use equipment according to the instruction manual.

Equipment registered based on the confirmation measurement at the user installation site.

This is a product for which interference was measured at the present installation site and confirmed to comply with the standard of Voluntary Control Council for Interference by Information Technology Equipment (VCCI). Before using the equipment at any location other than the present installation site, the member shall measure interference for confirmation and register the result to VCCI.

RF Equipment Notices

CE: European Community Compliance Statement

The equipment complies with the RF Exposure Requirement 1999/519/EC, Council Recommendation of 12 July 1999 on the limitation of exposure of the general public to electromagnetic fields (0–300 GHz). This wireless device complies with the R&TTE Directive.

Wireless Radio Use

This device is restricted to indoor use when operating in the 5.15 to 5.25 GHz frequency band.

Exposure to Radio Frequency Energy

The radiated output power of the Wi-Fi technology is below the FCC radio frequency exposure limits. Nevertheless, it is advised to use the wireless equipment in such a manner that the potential for human contact during normal operation is minimized.

FCC Bluetooth Wireless Compliance

The antenna used with this transmitter must not be colocated or operated in conjunction with any other antenna or transmitter subject to the conditions of the FCC Grant.

Bluetooth Industry Canada Statement

This Class B device meets all requirements of the Canadian interference-causing equipment regulations.

Cet appareil numérique de la Class B respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.
ENERGY STAR is a joint program of the U.S. Environmental Protection Agency and the U.S. Department of Energy helping us all save money and protect the environment through energy efficient products and practices.

All ASUS products with the ENERGY STAR logo comply with the ENERGY STAR standard, and the power management feature is enabled by default. The monitor and computer are automatically set to sleep after 10 and 30 minutes of user inactivity. To wake your computer, click the mouse or press any key on the keyboard.

Please visit http://www.energy.gov/powermanagement for detail information on power management and its benefits to the environment. In addition, please visit http://www.energystar.gov for detail information on the ENERGY STAR joint program.

*Note: Energy Star is NOT supported on Freedos and Linux-based products.
Safety information

Disconnect the AC power and peripherals before cleaning. Wipe the Desktop PC using a clean cellulose sponge or chamois cloth dampened with solution of nonabrasive detergent and a few drops of warm water then remove any extra moisture with a dry cloth.

- **DO NOT** place on uneven or unstable work surfaces. Seek servicing if the casing has been damaged.
- **DO NOT** expose to dirty or dusty environments. **DO NOT** operate during a gas leak.
- **DO NOT** place or drop objects on top and do not shove any foreign objects into the Desktop PC.
- **DO NOT** expose to strong magnetic or electrical fields.
- **DO NOT** expose to or use near liquids, rain, or moisture. **DO NOT** use the modem during electrical storms.
- **DO NOT** cover the vents on the Desktop PC to prevent the system from getting overheated.
- **DO NOT** use damaged power cords, accessories, or other peripherals.
- **DO NOT** expose to or use near liquids, rain, or moisture. **DO NOT** use the modem during electrical storms.
- **DO NOT** disassemble the battery.
- **DO NOT** throw the battery in fire. **DO NOT** short circuit the contacts. **DO NOT** disassemble the battery.
- **DO NOT** use this product in environments with ambient temperatures between 0˚C (32˚F) and 40˚C (104˚F).
- **DO NOT** cover the vents on the Desktop PC to prevent the system from getting overheated.
- **DO NOT** use damaged power cords, accessories, or other peripherals.
- **DO NOT** cover the vents on the Desktop PC to prevent the system from getting overheated.
- **DO NOT** use damaged power cords, accessories, or other peripherals.
- To prevent electrical shock hazard, disconnect the power cable from the electrical outlet before relocating the system.
- Seek professional assistance before using an adapter or extension cord. These devices could interrupt the grounding circuit.
- Ensure that your power supply is set to the correct voltage in your area. If you are not sure about the voltage of the electrical outlet you are using, contact your local power company.
- If the power supply is broken, do not try to fix it by yourself. Contact a qualified service technician or your retailer.

Hazardous moving parts. Desktop should be completely shutdown before servicing product. Replacing fan components should only be attempted by qualified service personnel.

**Hazardous Moving Parts Warning**

**WARNING:** Keep fingers and other body parts away from any moving parts.
Conventions used in this guide

To ensure that you perform certain tasks properly, take note of the following symbols used throughout this manual.

⚠️ **DANGER/WARNING:** Information to prevent injury to yourself when trying to complete a task.

⚠️ **CAUTION:** Information to prevent damage to the components when trying to complete a task.

💰 **IMPORTANT:** Instructions that you MUST follow to complete a task.

🔍 **NOTE:** Tips and additional information to help you complete a task.

Where to find more information

Refer to the following sources for additional information and for product and software updates.

**ASUS websites**

The ASUS website provides updated information on ASUS hardware and software products. Refer to the ASUS website www.asus.com.

**ASUS Local Technical Support**

Visit ASUS website at http://support.asus.com/contact for the contact information of local Technical Support Engineer.

The User Guide is located in the following folder in your Desktop PC:

C:\Program Files(X86)\ASUS\eManual

Welcome!

Thank you for purchasing the ASUS Desktop PC!
The ASUS Desktop PC provides cutting-edge performance, uncompromised reliability, and user-centric utilities. All these values are encapsulated in a stunningly futuristic and stylish system casing.

Read the ASUS Warranty Card before setting up your ASUS Desktop PC.

Getting to know your computer

Illustrations are for reference only. The ports, their locations and the chassis color vary with different models.
Front

1. **Power button.** Press this button to turn on your computer.

2. **Optical disk drive bay.** There is an optical disk drive in this bay.

3. **Optical disk drive eject button.** Press this button to eject the optical disk drive tray.

4. **USB 3.0 ports.** These Universal Serial Bus 3.0 (USB 3.0) ports connect to USB 3.0 devices such as a mouse, printer, scanner, camera, PDA, and others.

   - DO NOT connect a keyboard / mouse to any USB 3.0 port when installing Windows® operating system.
   - Due to USB 3.0 controller limitations, USB 3.0 devices can only be used under a Windows® OS environment and after USB 3.0 driver installation.
   - USB 3.0 devices can only be used as data storage only.
   - We strongly recommend that you connect USB 3.0 devices to USB 3.0 ports for faster and better performance for your USB 3.0 devices.

5. **Microphone port.** This port connects to a microphone.

6. **Headphone port.** This port connects to a headphone or speaker.

7. **LED Lighting Effect.** Customizable via the lighting control in ASUS Command, this LED lighting effect shows through the pattern.
USB 2.0 ports. These Universal Serial Bus 2.0 (USB 2.0) ports connect to USB 2.0 devices such as a mouse, printer, scanner, camera, PDA, and others.

USB 3.0 ports. These Universal Serial Bus 3.0 (USB 3.0) ports connect to USB 3.0 devices such as a mouse, printer, scanner, camera, PDA, and others.

- DO NOT connect a keyboard / mouse to any USB 3.0 port when installing Windows® operating system.
- Due to USB 3.0 controller limitations, USB 3.0 devices can only be used under a Windows® OS environment and after USB 3.0 driver installation.
- USB 3.0 devices can only be used as data storage only.
- We strongly recommend that you connect USB 3.0 devices to USB 3.0 ports for faster and better performance for your USB 3.0 devices.
3 **LAN (RJ-45) port.** This port allows Gigabit connection to a Local Area Network (LAN) through a network hub.

  Output rating: 19V 9.23A

- **230W**
  
  Input rating: 100-240V ~ 3.2A 50-60Hz  
  Output rating: 19.5V 11.8A

---

**Air vents.** These vents allow air ventilation.

---

! **DO NOT** block the air vents on the chassis. Always provide proper ventilation for your computer.
Setting up your computer

This section guides you through connecting the main hardware devices, such as the external monitor, keyboard, mouse, and power cord, to your computer.

Connecting an external monitor

Connect your monitor to the onboard HDMI output port to enjoy the Eco Energy Mode.

To connect an external monitor:

1. Connect an HDMI monitor to the HDMI port on the rear panel of your computer.
2. Plug the monitor to a power source.

When connecting the monitor to the discrete graphics card, the Eco Energy Mode is disabled.

When you are doing some tasks that do not require VGA performance, such as downloading tasks, Eco Energy Mode cuts down the power supplied to the discrete graphics card for a low overall system power consumption.

Connecting a USB keyboard and a USB mouse

Connect a USB keyboard and a USB mouse to the USB ports on the rear panel of your computer.
Turning your computer ON
This section describes how to turn on your computer after setting up your computer.

Turning your computer ON
To turn your computer ON:
1. Turn your monitor ON.
2. Press the power button on your computer.

3. Wait until the operating system loads automatically.

For details on shutting down your Desktop PC, refer to the Windows® 7 / Windows® 8.1 User Manual, which can be found in this manual.
Connecting a USB storage device

This desktop PC provides USB 2.0/1.1 and USB 3.0 ports on the front and rear panels. The USB ports allow you to connect USB devices such as storage devices.

To connect a USB storage device:

- Insert the USB storage device to your computer.

For details, refer to the section Removing a USB storage device in the Windows® 7 / Windows® 8.1 User Manual, which can be found in this manual.
Connecting microphone and speakers

This desktop PC comes with microphone ports and speaker ports on both the front and rear panels. The audio I/O ports located on the rear panel allow you to connect 2.1-channel, 4.1-channel, 5.1-channel, and 7.1-channel stereo speakers.

Connecting Headphone and Mic

Connecting 2.1-channel Speakers
Connecting 4.1-channel Speakers

Connecting 5.1-channel Speakers
Connecting 7.1-channel Speakers
Connecting multiple external displays
Your desktop PC may come with VGA, HDMI, or DVI ports and allows you to connect multiple external displays.

When connecting the monitor to the discrete graphics card, the Eco Energy Mode is disabled.

Setting up multiple displays
When using multiple monitors, you are allowed to set display modes. You can use the additional monitor as a duplicate of your main display, or as an extension to enlarge your Windows desktop.

To set up multiple displays:
1. Turn off your computer.
2. Connect the two monitors to your computer and connect the power cords to the monitors. Refer to Setting up your computer section in Chapter 1 for details on how to connect a monitor to your computer.
3. Turn on your computer.
4. Configure the Screen Resolution settings.

For some graphic cards, only the monitor that is set to be the primary display has display during POST. The dual display function works only under Windows.

For details, refer to the section Configuring the Screen Resolution settings in the Windows® 7 / Windows® 8.1 User Manual, which can be found in this guide.
Connecting an HDTV

Connect a High Definition TV (HDTV) to the HDMI port of your computer.

- You need an HDMI cable to connect the HDTV and the computer. The HDMI cable is purchased separately.
- To get the best display performance, ensure that your HDMI cable is less than 15 meters.
Chapter 3
Using your computer

Proper posture when using your Desktop PC

When using your Desktop PC, maintaining the proper posture is necessary to prevent strain to your wrists, hands, and other joints or muscles. This section provides you with tips on avoiding physical discomfort and possible injury while using and fully enjoying your Desktop PC.

To maintain the proper posture:

• Position your computer chair to make sure that your elbows are at or slightly above the keyboard to get a comfortable typing position.

• Adjust the height of your chair to make sure that your knees are slightly higher than your hips to relax the backs of your thighs. If necessary, use a footrest to raise the level of your knees.

• Adjust the back of your chair so that the base of your spine is firmly supported and angled slightly backward.

• Sit upright with your knees, elbows and hips at an approximately 90° angle when you are at the PC.

• Place the monitor directly in front of you, and turn the top of the monitor screen even with your eye level so that your eyes look slightly downward.

• Keep the mouse close to the keyboard, and if necessary, use a wrist rest for support to reduce the pressure on your wrists while typing.

• Use your Desktop PC in a comfortably-lit area, and keep it away from sources of glare such as windows and straight sunlight.

• Take regular mini-breaks from using your Desktop PC.
Using the optical drive

Inserting an optical disc
To insert an optical disc:

1. While your system is on, press the eject button to open the tray.
2. Place the disc on the optical drive with the label side outward if the desktop is positioned vertically and the label side up if the desktop is positioned horizontally.
3. Push the tray gently to close it.
4. Select a program from the AutoPlay window to access your files.

If AutoPlay is NOT enabled in your computer, to access the data on an optical disc:

- On Windows® 7, click the Start > Computer, and double-click the CD/DVD drive icon.
- On Windows® 8.1, hover your mouse pointer over the lower left corner of Windows® desktop then right-click on the Start screen's thumbnail. From the popup menu, click File Explorer, and then double-click the CD/DVD drive icon.

Removing an optical disc
To remove an optical disc:

1. While the system is on, do either of the following to eject the tray:
   - Press the eject button below the drive bay cover.
   - Right-click the CD/DVD drive icon on the Computer screen, and click Eject.

   To open the Computer screen on Windows® 8.1, hover your mouse pointer over the lower left corner of Windows® desktop then right-click on the Start screen's thumbnail. From the popup menu, click File Explorer to open the Computer screen.

2. Remove the disc from the disc tray.
Wired connection

Use an RJ-45 cable to connect your computer to a DSL/cable modem or a local area network (LAN).

Connecting via a DSL/cable modem

To connect via a DSL/cable modem:

1. Set up your DSL/cable modem.

   Refer to the documentation that came with your DSL/cable modem.

2. Connect one end of an RJ-45 cable to the LAN (RJ-45) port on the rear panel of your computer and the other end to a DSL/cable modem.
3. Turn on the DSL/cable modem and your computer.
4. Configure the necessary Internet connection settings.

- Contact your network administrator for details or assistance in setting up your Internet connection.
- For details, refer to the section Configuring the Internet connection settings in the Windows® 7 / Windows® 8.1 User Manual, which can be found in this manual.

Connecting via a local area network (LAN)
To connect via a LAN:

1. Connect one end of an RJ-45 cable to the LAN (RJ-45) port on the rear panel of your computer and the other end to your LAN.
2. Turn on your computer.
3. Configure the necessary Internet connection settings.

- Contact your network administrator for details or assistance in setting up your Internet connection.
- For details, refer to the section Configuring the Internet connection settings in the Windows® 7 / Windows® 8.1 User Manual, which can be found in this manual.
Wi-Fi connection (on selected models only)

Connect your computer to the Internet through a wireless connection.

To establish a wireless connection, you need to connect to a wireless access point (AP).

For details, refer to the section Configuring the Internet connection settings in the Windows® 7 / Windows® 8.1 User Manual, which can be found in this manual.
Chapter 5
Troubleshooting

This chapter presents some problems you might encounter and the possible solutions.

? My computer cannot be powered on and the power LED on the front panel does not light up.
- Check if your computer is properly connected.
- Check if the wall outlet is functioning.
- Check if the Power Supply Unit is switched on. Refer to the section Turning your computer ON in Chapter 1.

? My computer hangs.
- Do the following to close the programs that are not responding:
  1. Simultaneously press <Alt> + <Ctrl> + <Delete> keys on the keyboard, then click Task Manager.
  2. Do the following based on the operating system:
     - On Windows® 7:
       a) Click Applications tab.
       b) Select the program that is not responding, then click End Task.
     - On Windows® 8.1:
       Under Task Manager in the Processes tab, select the program that is not responding, then click End Task.
- If the keyboard is not responding, press and hold the Power button on the top of your chassis until the computer shuts down. Then press the Power button to turn it on.

? I cannot connect to a wireless network using the ASUS WLAN Card (on selected models only)?
- Ensure that you enter the correct network security key for the wireless network you want to connect to.
- Connect the external antennas (optional) to the antenna connectors on the ASUS WLAN Card and place the antennas on the top of your computer chassis for the best wireless performance.
The arrow keys on the number key pad are not working.

Check if the Number Lock LED is off. When the Number Lock LED is on, the keys on
the number key pad are used to input numbers only. Press the Number Lock key to
turn the LED off if you want to use the arrow keys on the number key pad.

No display on the monitor.

• Check if the monitor is powered on.
• Ensure that your monitor is properly connected to the video output port on your
computer.
• If your computer comes with a discrete graphics card, ensure that you connect your
monitor to a video output port on the discrete graphics card.
• Check if any of the pins on the monitor video connector is bent. If you discover bent
pins, replace the monitor video connector cable.
• Check if your monitor is plugged to a power source properly.
• Refer to the documentation that came with your monitor for more troubleshooting
information.

When using multiple monitors, only one monitor has display.

• Ensure that the both monitors are powered on.
• During POST, only the monitor connected to the VGA port has display. The dual
display function works only under Windows.
• When a graphics card is installed on your computer, ensure that you connect the
monitors to the output port on the graphics card.
• Check if the multiple displays settings are correct.

My computer cannot detect my USB storage device.

• The first time you connect your USB storage device to your computer, Windows
automatically installs a driver for it. Wait for a while and go to My Computer to
check if the USB storage device is detected.
• Connect your USB storage device to another computer to test if the USB storage
device is broken or malfunctions.
I want to restore or undo changes to my computer’s system settings without affecting my personal files or data.

On Windows® 7:
The Windows® System Restore feature allows you to restore or undo changes to your computer’s system settings without affecting your personal data such as documents or photos. For more details, refer to the section Restoring your system in Chapter 2.

On Windows® 8.1:
You can use Windows® 8.1 Refresh everything without affecting your files recovery option to restore or undo changes to your computer’s system settings without affecting your personal data such as documents or photos. To use this recovery option, click Settings > PC Settings > Update and recovery > Recovery from the Charms bar, select Refresh everything without affecting your files, and click Get Started.

The picture on the HDTV is distorted.

It is caused by the different resolutions of your monitor and your HDTV. Adjust the screen resolution to fit your HDTV. To change the screen resolution:

On Windows® 7:

1. Do any of the following to open the Screen Resolution setting screen:
   • Click Control Panel > Appearance and Personalization > Display > Change display settings.
     • Right click anywhere on your Windows desktop. When the pop-up menu appears, click Personalize > Display > Change display settings.

2. Adjust the resolution. Refer to the documentation came with your HDTV for the resolution.

3. Click Apply or OK. Then click Keep Changes on the confirmation message.

On Windows® 8.1:

Do any of the following to open the Screen Resolution setting screen:

From the Start screen
a) Launch the All Apps screen and pin Control Panel on the Start screen.

For details, refer to Pinning an app on the Start screen from the section Working with Windows® apps.

b) From the Control Panel, click Adjust screen resolution under Appearance and Personalization.

From the Desktop Mode screen
a) Launch the Desktop Mode from the Start screen.

b) Right click anywhere on your Desktop Mode screen. When the pop-up menu appears, click Personalize > Display > Change display settings.
**My speakers produce no sound.**

- Ensure that you connect your speakers to the Line out port (lime) on the front panel or the rear panel.
- Check if your speaker is connected to an electrical source and turned on.
- Adjust your speakers' volume.
- Ensure that your computer's system sounds are not Muted.
  - If it is muted, the volume icon is displayed as `.` To enable the system sounds, click `.` from the Windows notification area, then click `.`.
  - If it is not muted, click `.` and drag the slider to adjust the volume.
- Connect your speakers to another computer to test if the speakers are working properly.

**The DVD drive cannot read a disc.**

- Check if the disc is placed with the label side facing up.
- Check if the disc is centered in the tray, especially for the discs with non-standard size or shape.
- Check if the disc is scratched or damaged.

**The DVD drive eject button is not responding.**

1. On Windows® 7, click `Computer`
   On Windows® 8.1, hover your mouse pointer over the lower left corner of Windows' desktop then right-click on the Start Screen's thumbnail. From the popup menu, click **File Explorer** to open the **Computer** screen.

2. Right-click `DVD RW Drive`, then click **Eject** from the menu.
## Power

Starting for the first time

When you start your computer for the first time, a series of screens appear to guide you in configuring the basic settings of your Windows® 8.1 operating system.

To start your Desktop PC for the first time:

1. Press the power button on your Desktop PC. Wait for a few minutes until the setup screen appears.
2. From the setup screen, pick a language to use on your Desktop PC. As other settings appear, select your country or region, app language, keyboard layout, and time zone then tap Next.
3. Carefully read the License Terms, then tap I Accept.
4. Follow the onscreen instructions to configure the following basic items:
   - Personalize
   - Connect
   - Settings
   - Your account
5. After configuring the basic items, the Windows®8.1 tutorial appears. Watch this to learn more about Windows®8.1 functionalities.

Windows® 8.1 lock screen

The Windows®8.1 lock screen may appear when your Desktop PC enters the Windows®8.1 operating system. To proceed, tap on the lock screen or press any key on your Desktop PC’s keyboard.
Using the Windows® UI

The Windows® User Interface (UI) is the tile-based display used in Windows® 8.1. It includes the following features you can use while working on your Desktop PC.

Start screen

The Start screen appears after successfully signing in to your user account. It helps organize all the programs and applications you need in just one place.

You can press the Windows key \ to launch the Start screen from any apps.

Windows® apps

These are apps pinned on the Start screen and displayed on tiled-format for easy access.

Some apps require signing in to your Microsoft account before they are fully launched.
Hotspots
Onscreen hotspots allow you to launch programs and access the settings of your Desktop PC. The functions in these hotspots can be activated using your mouse.

Hotspots on a running app

Refer to the next page for the Hotspots' functions.
### Hotspot Action

<table>
<thead>
<tr>
<th>Hotspot</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>upper left corner</td>
<td>Hover your mouse pointer then click on the recent app’s thumbnail to go back to that app.</td>
</tr>
<tr>
<td></td>
<td>Move your mouse pointer down to display all the running apps.</td>
</tr>
</tbody>
</table>
| lower left corner | **From a running app screen:**  
Hover your mouse pointer on the lower left corner then tap ![hand icon] to go back to the Start screen.  
**NOTE:** You can also press the Windows key ![windows key] on your keyboard to go back to the Start screen.  
**From the Start screen:**  
Hover your mouse pointer on the lower left corner then tap ![hand icon] to go back to that app. |
| top | Hover your mouse pointer until it changes to a hand icon. Drag then drop the app to a new location.  
**NOTE:** This hotspot function only works on a running app or when you want to use the Snap feature. For more details, refer to **Snap feature** under **Working with Windows® apps.** |
| upper and lower right corner | Hover your mouse pointer to launch the Charms bar. |
Working with Windows® apps

Use your Desktop PC’s keyboard or mouse to launch and customize your apps.

Launching apps

- Position your mouse pointer on an app then left-click once to launch it.
- Press <Tab> twice then use the arrow keys to browse through the apps. Press <Enter> to launch your selected app.

Customizing apps

You can move, resize, or unpin apps from the Start screen using the following steps.

- To move an app, drag and drop the app to a new location.

Resizing apps

Right-click the app to activate its settings bar, then tap and select an app tile size.

Unpinning apps

To unpin an app from the Start screen, right-click on the app to activate its settings bar then click Unpin from Start.

Closing apps

- Move your mouse pointer on the top side of the launched app then wait for the pointer to change to a hand icon.
- Drag then drop the app to the bottom of the screen to close it.
- From the running app’s screen, press <Alt> + <F4>. 
Accessing the All Apps screen
From the All Apps screen, you can configure an app's settings or pin an app to the Start screen or to the Desktop mode taskbar.

Launching the All Apps screen
• On the Start screen, click 📌.
• From the Start screen, press <Tab>, then press <Enter> on your keyboard.

Pinning an app on the Start screen
1. Launch the All Apps screen.
2. From the All Apps screen, right-click an app to display its settings bar.
3. From the settings bar, click Pin to Start.
Charms bar

The Charms bar is a toolbar that can be triggered on the right side of your screen. It consists of several tools that allow you to share applications and provide quick access for customizing the settings of your Desktop PC.

Launching the Charms bar

When called out, the Charms bar initially appears as a set of white icons. The image above shows how the Charms bar looks like once activated.

Use your Desktop PC’s mouse or keyboard to launch the Charms bar.

- Move your mouse pointer on the upper or lower right corner of the screen.
- Press ` + <C>.
### Inside the Charms bar

<table>
<thead>
<tr>
<th>Charm</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Search" /> <strong>Search</strong></td>
<td>This charm allows you to look for files, applications, or programs in your Desktop PC.</td>
</tr>
<tr>
<td><img src="image" alt="Share" /> <strong>Share</strong></td>
<td>This charm allows you to share applications via social networking sites or email.</td>
</tr>
<tr>
<td><img src="image" alt="Start" /> <strong>Start</strong></td>
<td>This charm reverts the display back to the Start screen. From the Start screen, you can also use this to revert back to a recently opened app.</td>
</tr>
<tr>
<td><img src="image" alt="Devices" /> <strong>Devices</strong></td>
<td>This charm allows you to access and share files with the devices attached to your Desktop PC such as an external display or printer.</td>
</tr>
<tr>
<td><img src="image" alt="Settings" /> <strong>Settings</strong></td>
<td>This charm allows you to access the PC settings of your Desktop PC.</td>
</tr>
</tbody>
</table>
Snap feature
The Snap feature displays two apps side-by-side, allowing you to work or switch between apps.

Ensure that your Desktop PC’s screen resolution is set to 1366 x 768 pixels or higher before using the Snap feature.

Snap bar

Using Snap
To use Snap:

1. Use your Desktop PC’s mouse or keyboard to activate Snap onscreen.

   Using your mouse
   a) Click on an app to launch it.
   b) Hover the mouse pointer on the top side of your screen.
   c) Once the pointer changes to a hand icon, drag and drop the app to the right or left side of the display panel.

   Using your keyboard
   • Launch an app then press + left or right key to place the first app on the left or right side of the display panel.
## Other keyboard shortcuts

Using your keyboard, you can also use the following shortcuts to help you launch applications and navigate Windows® 8.1.

<table>
<thead>
<tr>

</tbody>
</table>
Turning your Desktop PC OFF

To turn your Desktop PC OFF:
Do any of the following to shut down your Desktop PC:
• From the Charms bar, click Settings > Power > Shut down to do a normal shutdown.
• From the login screen, click Power > Shutdown.
• If your Desktop PC is unresponsive, press and hold the power button for at least four (4) seconds until your Desktop PC turns off.

Putting your Desktop PC to sleep

To put your Desktop PC on Sleep mode, press the Power button once.
Enter the BIOS Setup

BIOS (Basic Input and Output System) stores system hardware settings that are needed for system startup in the Desktop PC.

In normal circumstances, the default BIOS settings apply to most conditions to ensure optimal performance. Do not change the default BIOS settings except in the following circumstances:

• An error message appears on the screen during the system bootup and requests you to run the BIOS Setup.
• You have installed a new system component that requires further BIOS settings or update.

Inappropriate BIOS settings may result to instability or boot failure. We strongly recommend that you change the BIOS settings only with the help of a trained service personnel.

Quickly enter the BIOS

Windows® 8.1 boot time is quite fast, so we developed the following ways for you to quickly access the BIOS:

• Press the power button for at least four seconds to shut down your Desktop PC, then press the power button again to turn your Desktop PC back on, and press <Del> during POST.
• When your Desktop PC is off, disconnect the power cord from your Desktop PC’s power connector. Reconnect the power cord and press the power button to turn on your Desktop PC. Press <Del> during POST.

POST (Power-On Self Test) is a series of software controlled diagnostic tests that run when you turn on your Desktop PC.
Recovering your system

Resetting your PC
The Reset your PC option restores your PC to its factory default settings.

Back up all your data before using this option.

To reset your PC:
1. Press <F9> during bootup.
2. From the screen, click Troubleshoot.
3. Select Reset your PC.
4. Click Next.
5. Select Only the drive where the Windows is installed.
6. Select Just remove my files.
7. Click Reset.

Recovering from a system image file
You can create a USB recovery drive and use this to recover your PC’s settings.

Creating a USB recovery drive

The USB storage device must have at least 16 GB available space.

All files on your USB storage device will be permanently deleted during the process. Before you proceed, ensure that you back up all your important data.

To create a USB recovery drive:
1. Launch the Control Panel from the All Apps screen.
   For details, refer to Launching the All Apps screen under Working with Windows® apps.
2. From the Control Panel's System and Security, click Find and fix problems.
3. Click Recovery > Create a recovery drive.

4. Click Copy the recovery partition from the PC to the recovery drive and then click Next.

5. Select the USB storage device where you want to copy the recovery files.

6. Click Next.

7. Click Create. Wait for a while for the process to complete.

8. When the process is completed, click Finish.
Removing everything and reinstalling Windows

Restoring your PC to its original factory settings can be done using the Remove everything and reinstall options in PC Settings. Refer to the steps below to use this option.

- Back up all your data before using this option.
- This process may take a while to complete.

1. Launch the Charm bar.
2. Click Settings > PC Settings > Update and recovery > Recovery.
3. Scroll down to view the Remove everything and reinstall Windows option. Under this option, click Get Started.

4. Follow the onscreen instructions to complete the reinstallation and reset process.
